

## **ATTENTION NEW FAMILIES AND RETURNING FAMILIES:**

So many parents have commented on their children's growth in math skills this year due to the implementation of the *Simple Solutions* program into our mathematics curriculum. Hurray for our wonderful students and their teachers!

As you know, students can lose an average of approximately 2.6 months of grade equivalency in computation skills during the summer break. Therefore we are so happy many of you have ordered the *Summer Solutions* workbooks to help keep you child's skills sharp over the summer, especially in the area of mathematics.

If you did not place an order for *Summer Solutions* but would like to, you can order one and have it shipped to your home.

<http://www.simplesolutions.org/summer/>

Be sure to order the grade level **your child is now completing**, not the grade for next school year, as the program is designed to maintain skills your child has already covered in school.

Have a great summer!
